DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1, 5, 6, 21 and 25, drawn to a method for electronically paying bills, classified in class 705, subclass 40.
- II. Claims 7, 8, 12, 13, 14, 17, 22, 23, 26 and 27 drawn to a system/network for paying bills, classified in class 709, subclass 217.
- III. Claims 18, 24 and 28, drawn to an article of manufacture for paying bills (computer readable media/programming), classified in class 700, subclass 11.

The inventions are distinct, each from the other because of the following reasons:

Inventions I. and II. are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case Invention I. can be carried out, at least in part, by hand. For example the step of generating a directive to transfer funds and the step of generating remittance information could be done by hand.

Inventions I. and III. are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as

claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case Invention I. can be carried out, at least in part, by hand. For example the step of generating a directive to transfer funds and the step of generating remittance information could be done by hand.

Inventions II. and III. are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention II. has separate utility such as the system/network could be used for electronic purchases and/or market research. See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above, because the search required for each Invention is not required for the other Inventions, and because the inventions have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

A telephone call was made to Alfred Stadnicki (Reg. No. 30,226) on December 24, 2002 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim

Art Unit: 3627

remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Elaine Gort whose telephone number is 703/308-6391.
